

COMPONENTS FOR RESIDENTIAL & LULA ELEVATOR CONTRACTORS AND MANUFACTURERS

Are you an elevator contractor assembling your own packages?

Are you an elevator manufacturer looking to job out some components?

Elevator Concepts is the one-stop source for all your component needs. We can supply you with any or all of these components, either our standard design or built to your specification:

- Rails and rail brackets
- Car frames with or without safeties
- Overspeed governors
- Roped hydraulic sheaves and guides
- Submersible pumping units
- Jacks
- **NEW!** - Winding drum machines
- Hoist cables and shackles
- Controllers - relay and PLC
- Magnetic landing systems
- Limits and brackets
- Fixtures
- Doorlocks
- Gate and door operators

We have a complete CNC fabrication job shop including a turret punch, brake, shear, mill and router ready to work for you. One part or hundreds of component packages - give us a call for the best products and prices.

Manufacturing the *finest* elevator components since 1986!

MANUFACTURER'S CERTIFICATION

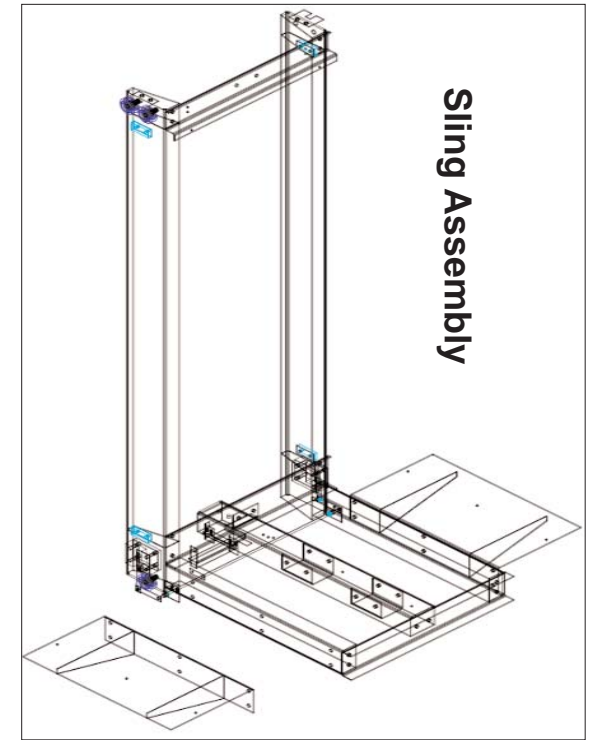

Elevator Concepts LTD certifies that the equipment manufactured or supplied by it conforms with the applicable portions of the most current edition of ASME A17.1 as of the date of manufacture. Electrical and control equipment manufactured or supplied by Elevator Concepts LTD is certified to conform with the applicable portions of the most current edition of ASME A17.5 as of the date of manufacture.

This certification extends only to the equipment as designed and supplied. Installation methods, modifications, or materials may result in and end use configuration outside of design and code parameters. Elevator Concepts LTD reserves the right to make changes in the design of its products. Elevator Concepts LTD shall not incur any obligation to install such changes or changes required by any other agency to products previously manufactured.

Engineering data will be provided to recognized code enforcement agencies upon request. Such requests must be made in writing on the agency's letterhead, and must refer to a specific section of the code in question.

Elevator Concepts LTD

Simple. Dependable. Inexpensive.

Also Available:

Rail Brackets
Rams Head
Pump Unit
Jack
Drum Machine
Controllers
Leveling Units
Fixtures

Roped Hydraulic System with Sling

Sling Sometimes called a car frame, this is the basic frame which consists of two stiles, a crosshead and a bolster or safety plank which supports the platform and cab of an elevator.

Our cantilever sling assembly is designed to accommodate direct hydraulic, roped hydraulic and winding drum machines. It is a knock-down design to allow for easy transportation and installation. It can be customized for a variety of platform sizes and cab heights, and equipped with either roller or slide guides. The 28DBG package can accommodate most residential applications as well as small LULA's. The 34 DBG package will accommodate residential elevators with full glass, and large LULA's with power doors. All major structural parts are made from 7 gauge steel, fabricated with precision on CNC machines, and painted gray. We believe you will find this to be the most rugged sling available for the residential and LULA market.
